

Getting Started with Your TestTrack Evaluation

Welcome to TestTrack! This guide walks you through the basic steps to install TestTrack and log in to the sample project.

Need help?

Your evaluation includes free technical and customer support. If you have any pre-sales, installation, or evaluation questions please email support@seapine.com or visit www.seapine.com/support.html for more information.

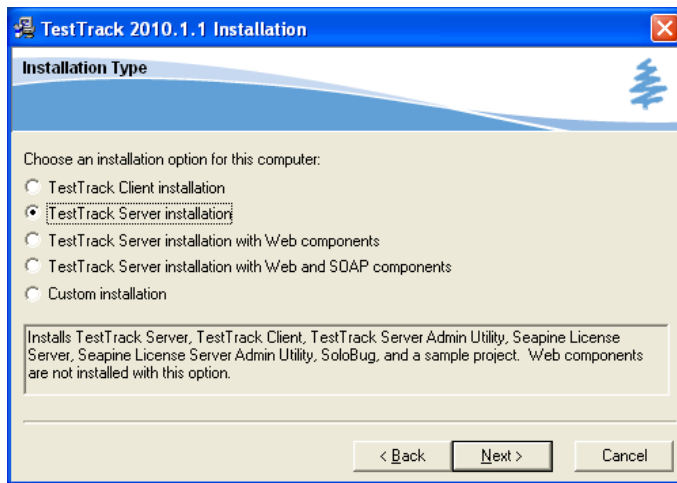

Step 1: Install TestTrack

For the evaluation, you will install the TestTrack and Seapine License Server client and server applications with the default options.

1. Download and run the installer.

Note: A download link is included in the evaluation email you received. Contact Seapine sales (sales@seapine.com) if you did not receive the email.

2. On the Welcome screen, click **Next**, accept the license agreement, and then click **Next** again.
3. Select **TestTrack Server installation** and click **Next**.

4. Follow the on-screen instructions to complete the installation. Remember to accept the default options, including the options to start the Seapine License Server and TestTrack Server.

Step 2: Add a Seapine License Server connection

The Seapine License Server Admin Utility connects to the Seapine License Server via TCP/IP. Before you can access a server, you need to add the server connection information.

1. Choose Programs > Seapine Software > Seapine License Server > Seapine License Server if you did not automatically start the license server after installation.
2. Choose Programs > Seapine Software > Seapine License Server > Seapine License Server Admin to start the admin utility. The Setup Server Connections dialog box opens. If it does not open, click **Setup** on the login dialog box.
3. Click **Add**.
4. Enter 'Local' as the Server Name and 'localhost' as the Server Address. Do not change the default port (5100).

5. Click **OK** and then click **Close** to close the Setup Server Connections dialog box.

Step 3: Add the evaluation serial number to the license server

1. In the Seapine License Server Login dialog box, select **Local** as the Server and enter 'Administrator' as the Username. A password is not required.

2. Click **Connect**. The License Server Admin Utility opens.
3. Click **Licenses** and then click **Add**.
4. Copy and paste your evaluation serial number into the Serial Number field.
5. Click **OK** to add the license.
6. Choose **File > Exit** to close the admin utility. Click **No** when you are prompted to change the password.

Step 4: Add a TestTrack Server connection

Before you can access a TestTrack Server from the TestTrack Client, you need to add the server connection information.

1. Choose Programs > Seapine Software > TestTrack > TestTrack Server if you did not automatically start the TestTrack Server after installation.
2. Choose Programs > Seapine Software > TestTrack > TestTrack Client to start the TestTrack Client.
3. Click **Setup**.
4. Click **Add**.
5. Enter 'Local' as the Server Name, 'localhost' as the Server Address, and '99' as the Port.

6. Click **OK** and then click **Close** to close the Setup Server Connections dialog box.

Step 5: Get started with TestTrack

1. In the TestTrack Login dialog box, enter 'Administrator' as the Username. Leave the Password field empty.

2. Click **Connect**. The TestTrack Project Selection dialog box opens.
3. Select **Sample Project** as the Project. This project demonstrates one possible configuration for managing requirements, test cases, and issues.
4. Click **OK**. You are now logged in and ready to start exploring TestTrack.

Not sure where to get started? The 'Learning the Basics' chapter in the [TestTrack User Guide](#) introduces you to TestTrack's basic features and can help you navigate through the application.
