Achieve higher quality software development with Seapine SQA. Featuring the automated testing power of QA Wizard™ Pro integrated with award-winning defect management from TestTrack® Pro and team-based change management from Surround SCM®, Seapine SQA helps you meet and exceed project quality goals and deadlines.

Seapine SQA’s automated processes help testing and development teams work together more effectively. Seamless integration among the suite’s three tools allows users to efficiently test software, track defects and defect fixes, and manage scripts in one fluid cycle.

Benefits:

**Shorten the testing lifecycle.** Seapine SQA decreases the time it takes to build and debug test scripts, providing a fast, cost-effective way to complete your test schedules.

**Work more efficiently.** Reduce scripting time, accelerate defect tracking, and efficiently manage source code with Seapine SQA’s proven, award-winning software products.

**Deliver higher quality products.** Seapine SQA streamlines QA efforts, helping testers, developers, and managers work together to deliver higher quality products.

**Get the best of both worlds.** Seapine SQA is an easy-to-use, full-featured solution that works for users of all skill levels. From experienced programmers to beginning test engineers, everyone on your team will benefit from Seapine SQA.

Objects database, and an extensible architecture, QA Wizard Pro allows team members to create more scripts in less time. Automated scripts created with QA Wizard Pro also require significantly fewer revisions, allowing your team to focus on testing, instead of maintenance.

Seapine SQA integrates quality assurance into the change management cycle with comprehensive defect tracking and flexible source control. Using TestTrack Pro, testers can add issues to the defect database and track the status of fixes throughout the testing cycle. TestTrack Pro is ready to use right
out-of-the-box and simple to maintain. Customizable fields and extensive workflow options allow you to configure TestTrack Pro to meet your needs and ensure your development and QA processes are followed. In addition, Surround SCM works with both TestTrack Pro and QA Wizard Pro to provide script management and complete source control. With Surround SCM, you’ll always have fast access to multiple versions of your scripts.

Seapine SQA addresses the full range of enterprise software testing challenges facing corporate IT departments, software developers, systems integrators, and consultants. Our solutions enhance the application development process by removing complexity, lowering costs, and improving team communication and collaboration.

**Facilitate Communication**

Seapine SQA keeps testing and development communications flowing with automated processes. Use TestTrack Pro’s automatic email notifications to alert developers of test failures and keep everyone informed of defect fixes and changes to source code. All team members stay up to date with Seapine SQA.

**Reduce Errors In Your Scripting Process**

Reducing errors that occur during scripting is critical to helping test engineers work more effectively. QA Wizard Pro replaces the traditional language-based scripting interface with an intuitive point-and-click interface. This easy-to-learn approach enables fast, reliable creation of scripts and eliminates the need to debug scripts.

**System Requirements:**

- **Windows**
  - 800 MHz Pentium PC
  - 100 MB hard disk space
  - 512 MB RAM (1 GB recommended)
  - Microsoft Internet Explorer 5.5 or later
  - Microsoft .NET Framework 2.0 or later
  - Active Desktop must be enabled

- **Mac OS X**
  - OS X-compatible Macintosh
  - 60 MB hard disk space
  - 256 MB RAM (512 MB recommended)
  - Mac OS X 10.3.9 or later

- **Linux**
  - 400 MHz Pentium PC
  - 60 MB hard disk space
  - 256 MB RAM (512 MB recommended)
  - Red Hat 8.0 or later, Red Hat Enterprise 2.1 or later, Fedora Core 1 or later, Mandrake 8.2 or later, Mandriva 2005 or later, SUSE 9.0 or later, Debian 3.1 or later, Ubuntu 5.04 or later

- **Solaris**
  - Sun SPARC-based computer
  - 60 MB hard disk space
  - 256 MB RAM (512 MB recommended)
  - Solaris 8 or later

**Full Featured, Simple to Use**

Seapine SQA is a full-featured solution that is easy to learn and use. The suite comes with award-winning user documentation that helps make the setup and installation process as easy as possible. Try Seapine SQA today and experience an automated, more efficient testing lifecycle.

**Best Practices Begin with Seapine Tools**

Seapine SQA is part of a growing suite of software development tools from Seapine Software that automate the software development and testing processes. Seapine’s products improve quality while reducing the time it takes to develop your products.

**Seapine SQA Advantages:**

- **Automate the testing lifecycle**
  Seapine SQA tracks defects, defect fixes, and related script changes throughout the testing process.

- **Work the way you want to work**
  Configure workflows and customize field names, field relationships, default values, and custom fields to match your team’s development processes.

- **Coordinate team-based testing**
  With integrated script management, users can track versions, remotely access scripts, and manage scripts along with other development assets.

- **Create scripts anytime, anyplace**
  Seapine SQA easily scales to support teams of 10 to 10,000 users working in multiple locations around the globe.
